SUPPLEMENTS

WHY THE SUPPLEMENTATION OF OUR PETS IS SO IMPORTANT?

There are many methods of feeding pets, and certainly, we can't pick one as the best. However, what the pet owner should pay the most attention to is definitely their pet's health and condition. If you choose complete pet food, pay attention to the quality and composition. Complete pet food should provide your pet with essential nutrients in appropriate quantities and correct proportions. However, adding supplements always comes with benefits for your pet's beautiful appearance and healthy system. Preparing meals might be tricky when one has to remember the proper balance of nutrients and add the right amount of minerals and vitamins. That's when Pokusa supplements come in handy and helpful in your everyday life.

BENEFITS OF OMEGA-3, DHA & EPA ACIDS

Try our oils
from OceanicLine!

Atlantic Salmon Oil

High-quality Atlantic salmon oil is a perfect supplement to the diet of a dog or cat. EPA and DHA acids contained in the oil clearly improve the condition of the skin and hair, relieve symptoms of allergies, enhance joint mobility, improve the efficiency of the cardiovascular system, and contribute to the functioning and development of the nervous system.

- rich in Omega-3 fatty acids
- recommended for poor eaters
- improves coat and skin condition

Product form:

- Oil:
 - ☐ 100 ml
 - ☐ 300 ml
 - ☐ 1000 ml

Antarctic Krill Oil

Antarctic Krill Oil is sourced from sustainable fisheries (MSC certified) in the Antarctic Ocean. It is rich in EPA, DHA fatty acids, and astaxanthin (a potent antioxidant). This supplement supports the proper function of the heart, circulatory system, and liver regeneration. It is a helpful addition to the diet in cases of various skin problems and serves as an alternative for animals allergic to fish.

- calming skin allergies
- supports the immune system
- strengthens the heart and the circulatory system

Product form:

- Oil:
 - ☐ 100 ml
 - ☐ 250 ml
 - ☐ 500 ml

Omega-3 Fish Oil

Top-quality oil from wild sea fish, distinguished by the high content of beneficial Omega-3 acids. Regular use contributes to the comfort of the locomotive system and improves the quality of coat and skin. It does not contain artificial preservatives, and due to its delicate fishy taste and smell, it is eagerly consumed by dogs and cats.

- rich in omega-3 fatty acids
- supports the musculoskeletal system
- certified and tested in an accredited laboratory

Product form:

- Oil:
 - ☐ 100 ml
 - ☐ 250 ml
 - ☐ 500 ml
 - ☐ 1000 ml

Cod Liver Oil

Rich in EPA and DHA fatty acids, as well as natural vitamins A and D, the oil obtained from fresh livers of wild cod fished in a responsible manner (MSC certified). Regular use improves the condition of the skin, hair, and the function of the locomotor and nervous systems. Perfect for the BARF diet. It does not contain dyes or preservatives.

- rich in D3 and A vitamins
- obtained from the liver of wild cod
- improves the condition of the skin and hair

Product form:

- Oil:
 - ☐ 100 ml
 - ☐ 250 ml
 - ☐ 500 ml

● an important element of a healthy diet.

Raw diet line

The basic component of a proper BARF diet is raw meat and organs. However, a menu based only on raw meat can cause deficiencies in nutrients important to your pet's health. To maintain a proper balance, we cannot forget about proper supplementation. For pets whose diet consists mainly of raw meat, our experts have developed the RawDietLine supplements line. Here, you will find key supplements recommended when following the BARF diet such as brewer's yeast, marine algae, haemoglobin, or plasma. Omega-3 unsaturated fatty acids are an extremely important component of a meat-based diet. Their natural source is fish oil or krill meal. Additionally, the raw diet should be accompanied by other natural supplements, such as cistus, eggshells, MSM, or rosehip, which increase the bioavailability of the products used.

The RawDietLine series offers a wide and complete range of products that are valuable for your pet's health.

Devil's Claw

A natural dietary supplement for adult dogs and cats. The product is recommended for use in case of problems in the osteoarticular system. It clearly contributes to maintaining the comfort of the movement, supporting its smoothness.

- for adult dogs and cats
- during problems of the osteoarticular system
- supporting comfort of the movement

Product form:

- powder:
- ☐ 100 g

Elm bark

Elm bark is rich in many nutrients and vitamins important for a pet's health. Due to unique protective properties, it is widely used in animals with a sensitive digestive system prone to irritation.

- for adult dogs and cats
- supports the digestive system
- recommended for relapsing diarrhea and reflux

Product form:

- powder:
- ☐ 100 g

Beta-Glucan

An important component in the diet of dogs and cats during recovery and when the body is weakened. It significantly increases the nutritional value of food and its palatability. Thanks to the viscosity of the fiber it contains, it slows down digestive processes and thus helps control excessive appetite and maintain normal body weight.

- for use after illnesses and injuries
- increases immunity
- improves palatability of food

Product form:

- powder:
- ☐ 250 g

BIO Algae

Multivitamin of natural origin for dogs and cats. It is the richest source of iodine and perfectly assimilable vitamins, minerals, and trace elements. It inhibits the formation of dental calculus and also enhances skin and coat pigmentation. The product has the Bio quality certificate.

- strengthens immunity
- natural source of iodine
- inhibits the build-up of dental calculus

Product form:

- powder:
- ☐ 350 g
- ☐ 1200 g
- ☐ 3500 g

Calcium citrate

Calcium Citrate is a source of highly absorbable calcium, which is the basic building block of bones and supports heart function. It enriches the diet of animals fed with raw meat or self-made meals. It can also be used in dogs with sensitive digestive systems and dogs on an elimination diet.

- source of calcium
- suitable for dogs with allergies
- supports proper heart function

Product form:

- powder:
- ☐ 250 g
- ☐ 1000 g

Cistus

100% natural cistus for dogs and cats. It contains a high level of polyphenols - volatile substances with a broad spectrum of activity: antiviral, antifungal, and antioxidant properties. When administered regularly, it contributes to changing body odour and protects the animal against external parasites such as fleas, mosquitoes, and ticks.

- protects against external parasites
- increases immunity
- suitable for dogs with allergies

Product form:

- powder:
- ☐ 100 g
- ☐ 500 g
- ☐ 1500 g
- tablets:
- ☐ 120 pieces

Brewer's yeast

Inactive brewer's yeast is a rich source of B vitamins, nucleotides, amino acids, trace elements. The yeast is an important supplement to the BARF diet of dogs and cats. It is recommended to give the yeast during pregnancy and lactation, to young animals, in case of digestive disorders and as an addition to everyday diet. Yeast has prebiotic and probiotic properties.

- improves skin and coat quality
- supports digestion
- improves the palatability of meals

Product form:

- powder: • tablets:
- ☐ 250 g ☐ 120 pieces
- ☐ 1000 g
- ☐ 2500 g

Brewer's yeast ProPlus

Pure brewer's yeast is rich in natural B complex vitamins and the prebiotics beta-glucans (25%) and mannan-oligosaccharides (MOS). They significantly increase the nutritional value of a meal and its palatability. They are an excellent dietary supplement for young animals and animals fed with raw meat, as well as in stressful situations and after previous diseases.

- increases immunity
- after diseases
- promotes growth of the young organism

Product form:

- powder:
- ☐ 250 g
- ☐ 1000 g

Kaolin

Natural white kaolin clay with a fine texture is extracted from the depths of the earth from sedimentary rocks. It supports digestive processes and has a detoxifying, purifying, and protective effect. When applied in decanted liquid form, it replenishes deficiencies of silicon, magnesium, lithium, sodium, and potassium. It can be applied as a toothpaste by adding oil and lemon juice or as a compress on irritated skin.

- has an anti-diarrheal effect
- soothes irritated skin
- cleans teeth from plaque and tartar

Product form:

- powder:
- ☐ 200 g

Hemoglobin

A natural product dedicated to dogs and cats fed with raw meat. It supplements the diet with blood deficiencies caused by bleeding meat during slaughter. It is a source of iron, high value animal protein, micro- and macroelements and vitamins. The product is recommended after surgeries and tick-borne diseases.

- essential for the BARF diet
- recommended in case of anaemia
- natural source of iron

Product form:

- powder: • tablets:
- ☐ 200 g ☐ 120 pieces
- ☐ 800 g

Hemoglobin & Blood Plasma

A natural product dedicated to dogs and cats fed with raw meat. It supplements the diet with blood deficiencies caused by bleeding of meat during slaughter. It is a source of iron, high quality animal protein, micro- and macroelements and vitamins.

- essential for the BARF diet
- recommended in case of anaemia
- strengthens immunity

Product form:

- tablets:
- ☐ 120 pieces

Collagen

Collagen obtained from extracted ocean fish skins. It contains polyamino acids, oligo-peptides, collagen polypeptides, and as many as 18 amino acids. It increases the elasticity of connective tissue and strengthens tendons and joints. Fish collagen also improves the appearance of skin, hair, and claws. It is recommended to administer it in combination with vitamin C, which is necessary for the synthesis of collagen.

- musculoskeletal prophylaxis
- improves the quality of skin and claws
- supports regeneration of the muscular system.

Product form:

- powder:
- ☐ 200 g
- ☐ 700 g

Krill

Krill is a source of over 18 amino acids, 11 vitamins, 70 minerals, and astaxanthin (a powerful antioxidant). It provides EPA and DHA in sufficient quantities for carnivores. It contains no heavy metals. RawDietLine Krill has been stripped of its exoskeleton before grinding, making it a completely safe product for dogs and cats without excessive fluoride.

- source of Omega acids
- improves palatability of meals
- improves coat condition

Product form:

- powder:
 - ☐ 150 g
 - ☐ 700 g
 - ☐ 2000 g

Green lipped mussel

100% natural freeze-dried green-lipped mussel meal. It is rich in glucosaminoglycans (GAGs), Omega-3 fatty acids, amino acids, and silicic acid, and therefore has a beneficial effect on the nutrition of joints and the condition of the skin and coat.

- prevention and regeneration of joints
- reinforces coat and skin
- improves physical condition of dogs and cats of all ages

Product form:

- powder:
 - ☐ 150 g
- tablets:
 - ☐ 120 pieces
 - ☐ 600 g

MSM

Biogenic sulfur compound intended for supplementing the diet of dogs and cats. Particularly important for joint flexibility and skin regeneration. Helps prevent muscle cramps and facilitates recovery after exertion.

MSM & Rosehip

MSM, combined with rosehip, supports the absorption and action of MSM. It calms skin allergies of dietary origin, while the vitamin C content strengthens immunity.

- support of the musculoskeletal system
- tissue renewal and regeneration
- supports skin regeneration

Product form:

- powder:
 - ☐ 300 g
 - ☐ 1000 g

Calcium Algae

A source of highly absorbable calcium for both dogs and cats fed a BARF diet and those with deficiencies in their diet. Calcium contributes to proper blood clotting, regulates energy metabolism, supports muscle function, improves the efficiency of neurotransmitters and brain function, enhances the functioning of digestive enzymes, and strengthens bones and teeth.

- highly bioavailable
- recommended in BARF diet as well as self-prepared cooked meals
- natural source of calcium

Product form:

- powder:
 - ☐ 450 g

Blood plasma

Meal from pig blood plasma supplements the deficiencies of plasma components in the BARF diet of dogs and cats. It provides high-quality protein rich in lysine and threonine. It is a source of elements such as sodium, potassium, chlorine, calcium, and magnesium. It influences the increase of natural immunity of the organism. In combination with hemoglobin, it forms the so-called whole blood.

- essential for the BARF diet
- source of organic protein
- increases natural immunity

Product form:

- powder:
 - ☐ 150 g

Milk thistle

A natural product for cats containing milk thistle extract (Silybum Marianum). The appropriate content of silymarin supports digestion, natural regeneration, and maintenance of physiological functions of liver cleansing. The administration of thistle to pregnant or lactating pets should be discussed with a veterinarian. It is important after a history of tick-borne diseases.

- protection and regeneration of the liver
- support of digestive processes
- suitable for dogs and cats

Product form:

- tablets:
 - ☐ 120 pieces

Rosehip

Rosehip is a rich source of vitamin C and therefore supports the immune system. Rosehip is especially important for sterilized/castrated animals, which are less resistant to free radicals. Rosehip also supports the proper functioning of the urinary system.

- strengthening of immunity
- preventative care of the urinary tract
- especially recommended for older and sterilised dogs

Product form:

- powder: ☐ 200 g ☐ 1000 g ☐ 2000 g
- tablets: ☐ 120 pieces

Eggshell

The meal obtained after grinding the eggshells is a source of perfectly digestible calcium, which is the basic building block of bones and joints. Calcium is essential for nerve conduction processes and the regular work of the heart. Shell meal is a source of magnesium, sodium, potassium, zinc and copper.

- an essential part of a BARF diet
- protection of bones and teeth
- natural source of calcium

Product form Calcium Eggshell:

- powder: ☐ 500 g ☐ 1500 g
- tablets: ☐ 120 pieces

Spiruline

Rich in nutrients such as protein, vitamins, and minerals. It influences the strengthening of the immune system and promotes the detoxification of the body. The chlorophyll contained in spirulina supports the work of the pancreas and thyroid gland. It can be used for daily dietary enrichment and during a period of increased strain on the organism, such as coat changes, pregnancy, or intensive training. It also alters the scent of a female dog during heat.

- support of the immune system
- regulation of blood sugar levels
- detoxification of the body

Product form:

- powder: ☐ 250 g ☐ 1000 g
- tablets: ☐ 120 pieces

Taurine

Taurine is an amino acid that supports the proper functioning of the heart and kidney system and is therefore essential in the diet of cats and very important in the diet of dogs. It is recommended for use with a BARF diet, dry food, and self-prepared meals. Taurine deficiency results in neural tube defects in kittens, the development of cardiomyopathy, and retinopathy leading to total blindness.

- an essential element of the feline diet
- influences the correct functioning of the heart
- supports the nervous system

Product form:

- powder: ☐ 150 g ☐ 400 g

VegeHerbs&Fruits

A mixture of dried vegetables, fruit and herbs. The product is intended for all breeds of dogs at every stage of life. The product replaces fresh fruit and vegetables and perfectly supplements a diet based on raw meat, dry food or self-prepared meals. It is a natural, concentrated source of vitamins, antioxidants, dietary fibre and carbohydrates.

- an essential portion of vegetables, fruit and herbs
- stimulates the immune system
- source of fibre

Product form:

- powder: ☐ 200 g ☐ 1000 g

Egg yolk

Egg yolk is a rich source of energy, vitamins, minerals and fatty acids. Thanks to the excellent proportions of essential amino acids, it has an effective effect on the development of muscles. It is a tasty supplement to a daily diet and has a beneficial effect on the condition of skin, hair and the general condition of the animal's organism.

- improves coat quality
- improves palatability of meals
- protects eyes from UVA radiation

Product form:

- powder: ☐ 150 g ☐ 800 g

Natural joints support

ChondroLine Sport

The product is intended for use for dogs regularly trained and subjected to heavy loads. The active ingredients of the product strengthen the structure and durability of joints, stimulate synthesis and regeneration of cartilage tissue and ensure proper secretion of joint fluid.

- for dogs in training, such as agility, dog frisbee, dog sled, flyball
- for dogs living in cities
- during intensive exercise.

Product form:

- powder:
- ☐ 350 g

ChondroLine Support +HA

The product is intended to enrich the diet of adult dogs. The composition of active ingredients supports the proper functioning of the locomotor system, and the addition of hyaluronic acid has a beneficial effect on its deep nourishment. The product is especially recommended for active dogs, as well as for large and giant breeds. It is also recommended for dogs living in cities, where they have to climb stairs and curbs on a daily basis.

- daily support of the joints
- supports the work of the musculoskeletal system
- recommended for active dogs as well as large and giant breeds

Product form:

- powder:
- ☐ 350 g

ChondroLine Help

The product is intended for use for dogs with movement difficulties as well as during rehabilitation, after injuries or operations. The active ingredients of the product strengthen the structure and regeneration of joints, help to stimulate the synthesis and regeneration of cartilage tissue and the correct secretion of joint fluid.

- in inflammatory conditions
- in spondylosis and dysplasia
- after injuries and operations

Product form:

- powder:
- ☐ 350 g
- ☐ 800 g

ChondroLine Junior

The supplement is intended for improving the diet of dogs during the period of intensive growth, between 3 and 12 months of age. It provides nutrients necessary for the proper development of the bone and joint system. The product is recommended for large giant breeds and dogs under training stress.

- correct development of the musculoskeletal system
- may be used until the age of 12 months
- recommended for fast-growing breeds

Product form:

- powder:
- ☐ 350 g

ChondroLine Senior

The product supports the correct functioning, protection, and regeneration of the osteoarticular system. It is intended for preventive use for dogs of all breeds after reaching the age of 7 years, when metabolism slows down. It contains glucosamine and chondroitin sulfate, the amounts of which decrease with age.

- correct functioning of the osteoarticular system
- for senior dogs
- supports digestive processes.

Product form:

- powder:
- ☐ 350 g

ChondroLine Help +HA

The liquid product is intended for use for dogs with movement difficulties as well as during rehabilitation, after injuries or operations. Chondroitin sulphate, glucosamine chloride, collagen and hyaluronic acid ensure proper nourishment of the joints and reduce friction on the joint surfaces. The extract from the devil's claw significantly improves the fluidity of movement.

- proper functioning of the bone and joint system
- high dose of hyaluronic acid
- easy application

Product form:

- liquid:
- ☐ 1000 ml

ChondroLine Junior +HA

The liquid product for enriching the diet of dogs during intensive growth. It provides the nutrients necessary for the proper development of the skeletal and articular systems. It is dedicated to large and giant breeds and dogs subjected to training stress. Its rich composition contributes to the proper nourishment of the musculoskeletal system.

- palatable and easy-to-apply product
- support for the musculoskeletal system
- for puppies of all breeds

Product form:

- liquid:
- ☐ 500 ml

ChondroCare

The unique composition of chondroitin sulphate, glucosamine and Boswellia serrata frankincense extract, which strengthens the structure of joints and helps stimulate the synthesis and regeneration of cartilage tissue and the correct secretion of joint fluid. The product is intended for prophylactic use in large breed dogs, working dogs and those over 5 years of age.

- prevention of musculoskeletal issues.
- high concentration of boswellic acid
- improves the elasticity of tendons

Product form:

- tablets:
- ☐ 120 tablets

ChondroHelp

The product is intended for dogs with movement difficulties. The ingredients strengthen the structure of joints, help stimulate the synthesis of cartilage tissue regeneration, and promote the correct secretion of joint fluid.

- in difficulties with movement
- after injuries and operations
- the tablets are tasty and easy to divide.

Product form:

- tablets:
- ☐ 110 tablets

ChondroJunior

The product is intended for supplementing the diet of dogs during intensive growth. It provides the necessary active substances for the proper development of the musculoskeletal system. It is intended for fast-growing, large, and giant breeds, as well as those at risk of osteoarticular system dysfunctions, such as dysplasia or other postural defects.

- support for the development of the musculoskeletal system
- economic dosage
- recommended for large and giant breeds

Product form:

- tablets:
- ☐ 120 tablets

ChondroCat

The product is intended for cats from 3 months of age for prevention of skeletal issues. Recommended especially during the period of intensive growth of kittens, large breed cats (e.g., Maine Coon, Norwegian Forest cat, Siberian cat), and cats at risk of musculoskeletal system dysfunction.

- enriched diet
- support and nourishment of the musculoskeletal system
- recommended during growth

Product form:

- tablets:
- ☐ 110 tablets

PowerDog Flexi Booster

The product is dedicated to adult dogs, especially the active ones, and breeds predisposed to problems in the musculoskeletal system. The blend of well-absorbed ingredients has been designed to maintain optimal condition and support the locomotor system. Hydrolyzed fish collagen type II nourishes the connective tissues that build, among others, joints and bones. Boswellic acids improve blood circulation and reduce swelling in the locomotor system.

- for adult dogs, especially the active ones
- protection of the joints for working dogs
- support the strenght of the muscles

Product form:

- Powder:
- ☐ 350 g

PowerDog Isotonic Drink

The powdered formula to be dissolved in water. It influences the water-electrolyte balance, supplements the deficiency of mineral salts and carbohydrates burnt during physical effort. The balanced electrolyte level allows for quick thirst quenching and replenishment of lost macroelements, which are necessary for physical performance and muscle regeneration. Sodium contained in the product reduces the risk of muscle cramps.

- for sporting dogs
- for use during hot weather
- after digestive disorders (diarrhea)

Product form:

- powder:
- ☐ 300 g
- ☐ sachets 12 x 8 g

PowerDog Pure BCAA

The mixture of easily absorbable amino acids essential for proper muscle regeneration and development. The product increases workout capacity (strength, endurance) and reduces the feeling of tiredness after training. It is recommended for working dogs and dogs in training.

- reduces post-workout fatigue
- improves training performance
- supports muscle regeneration

Product form:

- powder:
- ☐ 200 g

PowerDog HMB+CA

The product is dedicated to sports dogs being introduced to training, as well as to convalescents whose muscles require support after operations or injuries. It inhibits the degradation of muscle proteins and reduces the activity of markers of muscle cell damage. It increases the body's power output and contributes to the increase of strength and muscle mass, accelerating their regeneration.

- for sports and working dogs
- for convalescents
- increases muscle mass

Product form:

- powder:
- ☐ 250 g

Spermaster

The product is intended to enrich the diet of stud males in the reproductive period and in the case of poorer semen quality. The active ingredients influence the effective course of the spermatogenesis process. Preparation based on selenium yeast, enriched with L-carnitine and evening primrose, increases the volume of produced ejaculate, improves vitality, and increases the number of properly formed sperm.

- improving the quality of semen
- regeneration of the reproductive system
- support the process of spermatogenesis

Product form:

- powder:
- ☐ 350 g

Reproductal+

The product for female dogs during breeding and pregnancy. It supports the functioning of the reproductive system and helps to achieve a more stable pregnancy. The active ingredients of the product have astringent properties and minimize the risk of birth hemorrhages. It also influences the proper development of fetuses, especially their growth and nervous system.

- supplements calcium deficiency
- supports the reproductive system
- supports healthy fetal development

Product form:

- powder:
- ☐ 350 g

LactoVital

The product designed to enrich the diet of female dogs during the postnatal and lactation period. The active ingredients contribute to a quick improvement in physical condition and help improve the functioning of the mammary glands, increasing the amount of milk produced during the peak demand period. It is especially recommended for female dogs with a large litter or a weakened physical condition after pregnancy and childbirth.

- supports lactation
- supports the reproductive system
- improves physical condition after birth.

Product form:

- powder:
- ☐ 500 g

LactoStop

The product supports the inhibition of lactation. The active ingredients show protective and regenerative effects on the mammary glands. Salvia officinalis reduces lactation and strengthens antimicrobial protection. Hops cone contains substances with tranquilizing, bacteriostatic, and estrogenic properties. Walnut leaf regenerates milk gland cells during the period of milk gland drying. Apply for a maximum of 7 days.

- supports inhibition of lactation
- helps in cases of pseudopregnancy
- protects the mammary glands from inflammation.

Product form:

- powder:
- ☐ 150 g

GoldMilk Puppy

Complete milk substitute formula for puppies from their first day of life. This formula is rich in DHA acids, minerals, and vitamins to support the development of the young organism.

GoldMilk Kitten

The product is a perfect substitute for cat's milk and satisfies all nutritional needs of adolescent kittens, providing the body with easily digestible protein and fat.

- rich in amino acids and minerals
- supports the proper development from 1st day of life
- supports the immune system, bone and teeth

Product form:

- powder:
- ☐ 500 g
- ☐ 1000 g

Kitten

- powder:
- ☐ 250 g
- ☐ 500 g

JuniorOptimal+

Product for puppies and young dogs with an optimal concentration of vitamins and minerals. It ensures the harmonious development of the osteoarticular system, and the addition of probiotic yeast stabilizes digestive processes. Carefully selected active substances support the vitality of the organism and the formation of a beautiful coat. The addition of vitamin D3 has an anti-rickets effect.

- support for proper development
- for dogs over 2 months of age
- comprehensive dose of vitamins, minerals

Product form:

- powder:
- ☐ 300 g
- ☐ 700 g

Snow White & Mix Color

Product that improves the condition of skin and coat. It is especially recommended during the period of hair coat replacement, in case of problems with dull, lustreless hair, and in cases of excessive shedding. The formula is highly recommended for dogs with lighter and mixed colors of coat. Thanks to immunomodulating ingredients, it prevents tear staining near the eyes.

- for show dogs
- improvement of the quality and condition of the skin
- prevention of eye stains

Product form:

- powder:
 - ☐ 300 g
 - ☐ 1000 g

Deep Color & Super Shine

Product that improves the condition of the skin and coat. It is especially recommended during the period of hair coat replacement, in case of problems with dull, lustreless hair, and in the case of excessive shedding. The formula is highly recommended for dogs with darker coat colors. The product improves the pigmentation of the nose, mucous membranes, and hair.

- for show dogs
- improvement of the quality and condition of the skin
- improves pigmentation

Product form:

- powder:
 - ☐ 300 g
 - ☐ 1000 g

ShowMax

The product improves the condition of the skin and coat and enhances the depth of hair color. The coat becomes glossy, soft, and vibrant. It is recommended for cases of excessive hair loss, lack of coat gloss, and increased thickening of epidermis exfoliation. The product is especially recommended for performance dogs. Do not combine with BiotinMax.

- for small breed show dogs
- improvement of skin quality and condition
- improvement of skin pigmentation

Product form:

- tablets:
 - ☐ 500 pieces

BiotinMax

The product is dedicated for dogs whose hair requires comprehensive regeneration. The active substances have a favourable effect on reducing hair loss, accelerating the growth rate and improving the quality of skin and hair. It contains biotin, zinc and copper in a chelated form, which increases the absorption of the active substance and improves its utilisation. Do not combine with ShowMax.

- for show dogs of medium and large breeds
- accelerated hair growth
- improvement of pigmentation

Product form:

- powder:
 - ☐ 350 g

Dermacare Clinic

Product for dogs with skin problems. The active ingredients in the preparation have a positive effect on the skin, which is also reflected in the condition of the hair and its growth rate. The use of the product has a positive influence on the dog's quality of life and reduces itching reactions.

- during convalescence after treatment of skin infections
- helpful in allergies
- helpful in atopic dermatitis

Product form:

- tablets:
 - ☐ 500 pieces

DiamondCat

A natural supplement intended for improving the condition of the fur and skin of adult cats. The optimal concentration of active ingredients, such as biotin, zinc, and copper chelates, quickly and effectively stimulates the regenerative functions of the skin and hair matrix. It effectively enhances the depth of color and stimulates the replacement of dead hair and and growth of new hair

- for show cats
- supplementing the diet during intensive hair replacement
- improving the quality and condition of the skin

Product form:

- tablets:
 - ☐ 110 pieces

MultivitDog | MultivitCat

Carefully selected, complete set of vitamins, amino acids, and minerals intended for dogs and cats of all breeds and age groups. PUPPY

Beef with Salmon

Grain-free, multi-protein dry food based on beef with the addition of salmon and superfood ingredients such as Polish apples, dried pumpkin, and cranberries. Our puppy food provides a perfectly balanced diet with an optimal amount of easily digestible protein with high nutritional value. The recipe is recommended for puppies of all breeds. The content of Omega-3 fatty acids, DHA, and EPA helps to lower the level of triglycerides in the blood, improve the elasticity of blood vessels, and regulate blood pressure.

Product form:

• kibbles:

- ☐ 1 kg
- ☐ 3 kg
- ☐ 12 kg

PUPPY

Lamb with Duck

Grain-free dry food based on lamb with duck meat and superfood ingredients such as Polish apples and dried pumpkin. Our food does not contain chicken fat, protein or artificial preservatives that may cause allergies. B vitamins present in lamb meat help prevent cardiovascular diseases, and vitamin A found in duck meat has a positive effect on eyesight, skin and fur condition, as well as maintaining healthy bones. Recommended for puppies of all breeds..

Product form:

• kibbles:

- ☐ 1 kg
- ☐ 3 kg
- ☐ 12 kg

ADULT

Veal with Salmon

Grain-free, complete dry food, based on veal with salmon and superfood ingredients. Recommended for dogs of all breeds with normal and increased physical activity. In the production process of our food, pork protein is hydrolyzed and divided into smaller parts. It is an excellent alternative for dogs prone to allergies. Veal is considered one of the healthiest meats due to its high protein and low fat content.

Product form:

• kibbles:

- ☐ 1 kg
- ☐ 3 kg
- ☐ 12 kg

ADULT

Beef

Created on the basis of beef with the addition of hydrolyzed pork protein and superfood ingredients such as cranberries, broccoli and tomatoes. Beef is a valuable source of protein that is a component of every body cell and a building block of the body. Beef contains more iron than meat from other animal species, so it is especially recommended for dogs with anemia. It is also a source of vitamins A, E, D and B vitamins. Recommended for adult dogs of all breeds.

Product form:

• kibbles:

- ☐ 1 kg
- ☐ 3 kg
- ☐ 12 kg

ADULT

Salmon with shrimps

Complete food based on salmon meat with the addition of shrimp and superfood ingredients. Fresh salmon meat is an excellent source of high-quality protein and Omega-3 fatty acids. It also contains vitamins A, D, E and B vitamins, minerals such as iron, calcium, magnesium and phosphorus. Shrimps provide our pet with selenium, iodine, magnesium and potassium. All the mentioned nutrients are necessary for the proper functioning of the body. Food recommended for active dogs with higher caloric needs.

CAT FOOD

Lamb

Lamb meat is exceptionally juicy, delicate, and velvety. It has a high content of linoleic acid, which is responsible for preventing obesity and stimulating the immune system. Lamb is a rich source of valuable nutrients, including protein, minerals (such as magnesium, calcium, and phosphorus), B vitamins, amino acids (e.g., L-carnitine), and essential fatty acids (EFA). Compared to meat from other farmed animal species, lamb has a higher content of Omega-3 acids.

Product form:

- ☒ can:
- ☐ 200 g

Cod

Grain-free, complete wet food with cod broth and sea algae. Cod is a rich source of protein, B vitamins, and Omega-3 acids which have a beneficial effect on the functioning of the brain, heart and the immune system. They have a positive impact on the condition of the skin and fur. Cod is also a source of phosphorus, which, together with calcium, is necessary to maintain healthy bones and teeth.

Product form:

- ☒ can:
- ☐ 200 g

Beef

Balanced meal with an optimal amount of protein and a high nutritional value. Beef meat contains more digestible iron compared to meat from other species of slaughter animals. It is a rich source of vitamins including: fat-soluble vitamins A, E, D, as well as B vitamins. B vitamins have many health-promoting properties such as supporting the proper functioning of the nervous system and the production of erythrocytes.

Product form:

- ☒ can:
- ☐ 200 g

Turkey

Perfectly composed, mono-protein turkey wet food. The ideal proportions of skeletal meat and offal with turkey broth create a tasty and healthy combination of a complete meal even for the pickiest cats with a tendency to be overweight. The addition of the highest quality certified sea algae ensures a supply of valuable micro and macro elements for the health and vitality of your cat! Turkey meat is one of the leanest meats and is an excellent source of B vitamins.

Product form:

- can:
- ☐ 200 g

Rabbit

Super premium, complete, grain-free wet food based on rabbit meat with the addition of offal and a superfood ingredient - sea algae. Rabbit meat contains highly digestible animal protein - an essential element of every cat's diet. Rabbit meat is easily digestible, delicate and juicy. It is a product rich in minerals, including B vitamins and amino acids. All the nutrients guarantee a building material for protein synthesis and the proper functioning of the nervous system of your cat.

Product form:

- can:
- ☐ 200 g

Quail

Complete, grain-free wet food based on quail meat with the addition of offal and a superfood ingredient - sea algae. Quail meat is very delicate, lean, easily digestible, and rich in nutrients. It has a high content of vitamin A, which is responsible for the sense of sight. B vitamins and vitamin E, as well as minerals such as calcium, phosphorus, and iron, support the healthy development of kittens.

Product form:

- can:
- ☐ 200 g

DRY FOOD
FOR CATS

Veal with rabbit

Complete dry food based on veal with the addition of rabbit meat and superfood ingredients that are a source of fiber. Veal meat is a source of riboflavin, thiamine and niacin, as well as iron, phosphorus, sodium and potassium. It is lean and low in calories, as well as rabbit meat which is also rich in unsaturated linolenic acid. It has anti-inflammatory properties and participates in the process of creating DHA and EPA. Rabbit meat is much less likely to cause allergic reactions than meat from other animal species. Recommended for kittens of all breeds.

Product form:

- kibbles:
- ☐ 3 kg

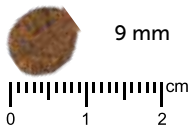

Lamb with turkey

Complete dry food based on lamb with turkey meat and superfood ingredients such as broccoli and tomatoes. Lamb meat is a rich and essential source of protein, vitamins and minerals in a cat's diet. Fiber improves the functioning of the digestive system and facilitates the removal of hairballs. The optimal dose of taurine, necessary for the proper functioning of the body, promotes the proper heart function. Turkey can be a valuable addition to cat's diet. It is low-fat and rich in protein. Recommended for adult cats of all breeds.

Product form:

● kibbles:

□ 3 kg

Turkey with veal

Complete dry food for adult cats based on turkey meat with the addition of veal and superfood ingredients that are a source of fiber. The appropriate dose of taurine, an essential amino acid for cats, affects the proper functioning of the heart. Due to its high protein and low-fat content, turkey meat is easily digestible. Delicate veal meat is a real delicacy for cat gourmets and provides them with many valuable nutrients. It is a source of B vitamins, which play a very important role in the proper functioning of the nervous and immune systems. Recommended for adult cats of all breeds.

Product form:

● kibbles:

□ 3 kg

Beef with duck

Complete dry food based on beef with duck meat and superfood ingredients such as broccoli and berries. Even though cats don't eat beef in nature, adding beef to the cat's diet is a very good idea. Beef contains many valuable nutrients such as taurine, B vitamins, calcium, phosphorus, and potassium. It is also a rich source of iron compared to meat from other species of farm animals. Duck is classified as a fatty meat and contains large amounts of healthy unsaturated fatty acids. Recommended for adult cats of all breeds.
